VIRATEK, INC.

# increased protection, productivity & consistency through innovation

## addressing your viral protection needs

The LE2020 & LE2828 FRONTLINE MISTING TUNNELS enable you to STOP viruses BEFORE they enter your facility. Simply locate the totally portable (or fixed) unit to receive all of your incoming animal crates, bedding, feed, etc. All of the items fed through the Misting Tunnel receive a 360 degree fine mist of sanitizer providing COMPLETE DECONTAMINATION in 7 SECONDS!

## increasing the productivity of your staff

Studies show that it takes over 2 minutes for your staff to completely decontaminate each incoming item by hand-spraying. The Misting Tunnel is not just a time saver, it also eliminates the repetitive hand motion required when hand-spraying.

## ensuring consistency

Consistent and complete decontamination is ensured since variations in employee techniques and capabilities are eliminated. It also reduces handling time required to decontaminate by hand-spraying.

## ViraTek's Misting Tunnel Pass-Through & Door

IS YOUR FACILITY  
DESIGNED AS A  
BARRIER TO  
ACCOMMODATE THE  
MISTING TUNNEL ON  
THE DIRTY SIDE AND  
THE OFF-LOAD  
CONVEYOR ON THE  
CLEAN SIDE?  
DO YOU NEED A PASS-  
THROUGH WITH A  
SEALABLE DOOR WHEN  
THE MISTING TUNNEL  
IS NOT IN USE?

Did you answer "YES" to either of these questions? If so, ViraTek's Pass-Through & Door provide a SEAMLESS NESTING DESIGN that makes the transition from dirty to clean simple and effective.

The Pass-Through frame and Door are constructed of Stainless Steel and can accommodate a 4" – 8" thick wall.

The stainless steel rollers on the bottom of the door ensure the smooth transition of all of your items moving through the Misting Tunnel to the Off-Load Conveyor.

The hinged door is gasketed and is secured in place with two adjustable lever locks.

## Wash-Off Labels

DO YOU PUT LABELS ON YOUR RACKS, CAGES, BOTTLES & OTHER EQUIPMENT?

DO YOUR EMPLOYEES HAVE TO PEEL, SCRAPE & USE CHEMICALS TO TRY TO REMOVE THE LABEL & ADHESIVE RESIDUE LEFT BEHIND?

**VIRATEK, INC.  
HAS YOUR SOLUTION!**

## Wash-Off Labels

Labels and adhesive COMPLETELY DISINTEGRATE in less than 30 seconds in any water temperature in the wash cycle, or can simply be wiped away with a wet sponge. Wash-Off Labels leave NO RESIDUE on your equipment and NO DEBRIS to clog up your drains.

## Pre-printed, Custom Printed and Blank Labels are Available

- Economical
- Use your staff's time more wisely
- Keep your equipment spotless
- Eliminate misinformation from old labels

**NEW! BIOHAZARD LABELS  
ARE NOW AVAILABLE.**
